Double cast-on method

Double cast-on method

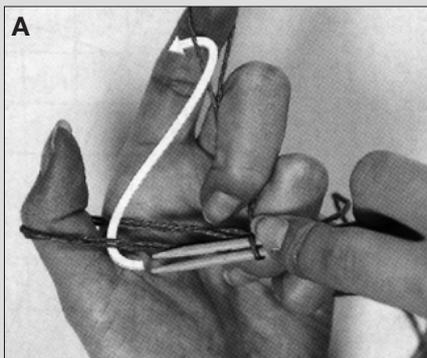

Work with the double yarn

Work the cast-on with a single and a double yarn. The double yarn must be at least twice as long as the desired length of the foundation edge.

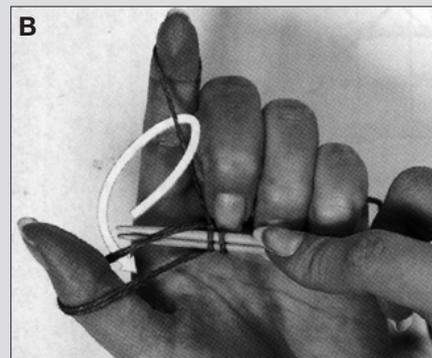

Bring the single yarn (from the ball) over your index finger, the double yarn from the outside in over the thumb of your left hand and hold down lightly with the remaining fingers.

Make an initial loop. For the 1st st. bring the double yarn from the outside to the inside over your thumb, bring the needle around the outer (front) double thread and bring the single yarn through (see dia. A). Pull the st. up.

For the 2nd st. bring the double yarn from the inside to the outside over your thumb, bring the needle around the inner thread and bring the single yarn through (see dia. B). Pull st. up.

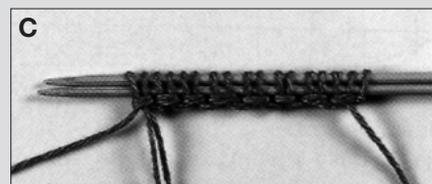

For the **1st st.** bring the double yarn **from the outside to the inside** over your thumb and bring the yarn through.

For the **2nd st.** bring the double yarn **from the inside to the outside** over your thumb and bring the yarn through.

Work alt sts. 1 and 2 until you have the number of sts. required. Now P 1 more WS row, then cont in basic patt.

Tip: If you cast on very firmly, use 2 needles as shown in the photo; if you work very loosely, use just one needle.
